

HAVA DAMPERLERİ

İRİS DAMPER

İris kanal damperi , yuvarlak kanallarda hava akışının kolay ölçümü ve ayarlanması için dizayn edilmiştir. Hem üfleme hem de egzoz kanallarında kullanılırlar. İris damperler galvaniz çelikten imal edilirler. Basınç kaybı ve hava hacmini ölçmek için 2 Adet manometre bağlantısı ile donatılmıştır. İlgili diyagram ve ölçülmüş ΔP değerleriyle istenilen hava akışı ayarlanabilir ya da okunabilir. Ayarlama bir ayar kulpu ile yapılır. Ayarlama yapıldıktan sonra, değer sabitlenir.

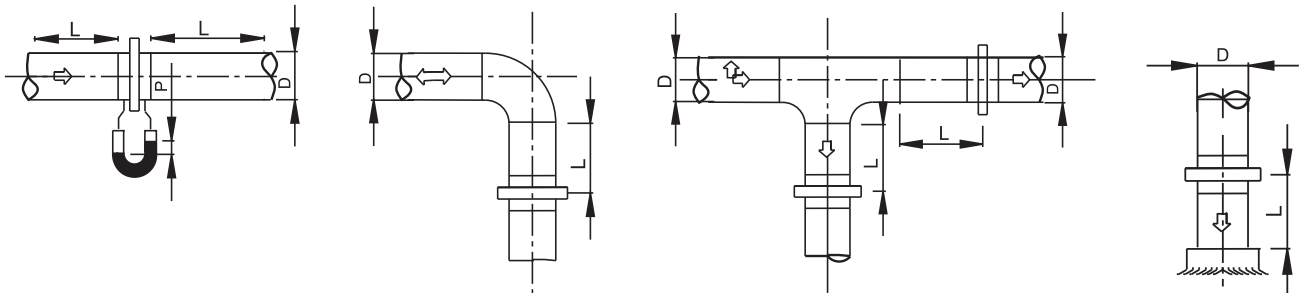

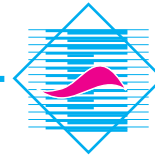

STANDART ÖLÇÜLER

Ebat	ØA	ØB	C	L
100	99	165	50	110
125	124	210	50	110
160	159	230	50	110
200	199	285	50	110
250	249	335	55	135
315	314	410	55	135
355	354	450	55	135
400	398	525	70	190
500	498	655	70	210
630	628	815	70	210

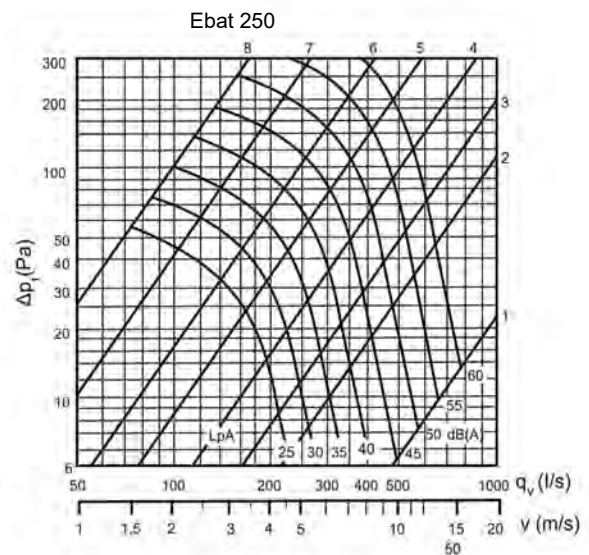

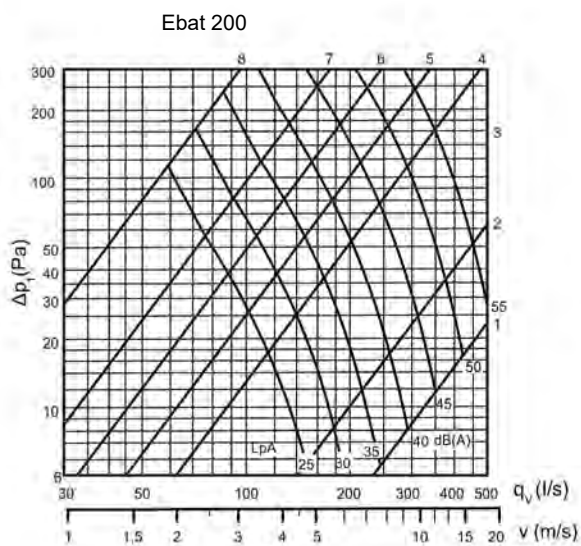

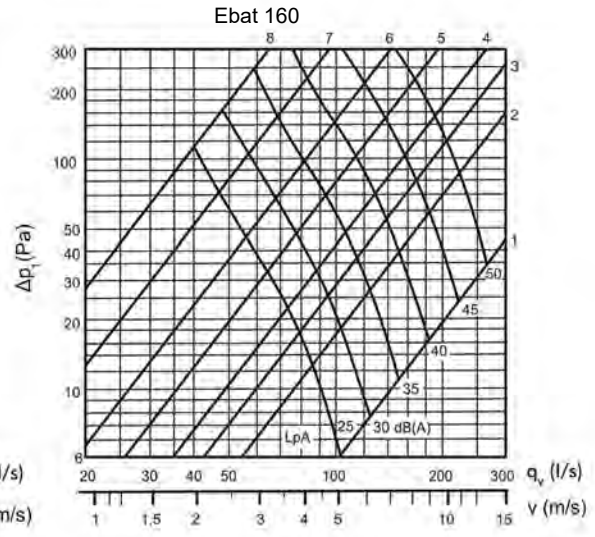

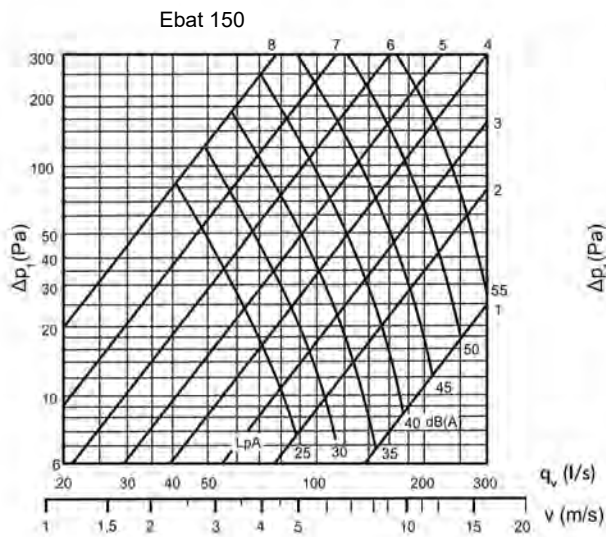

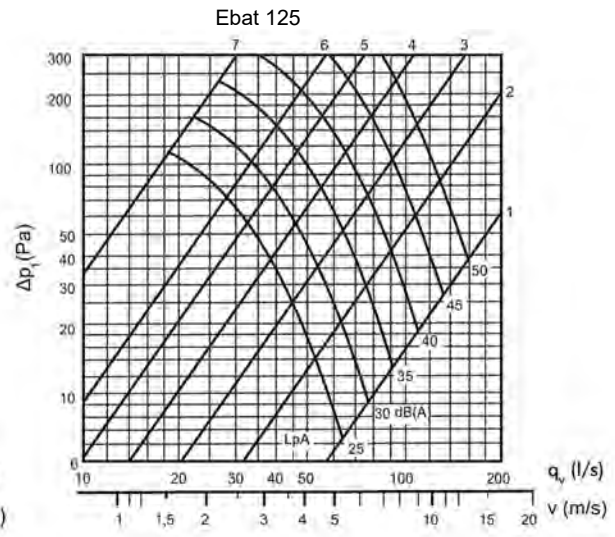

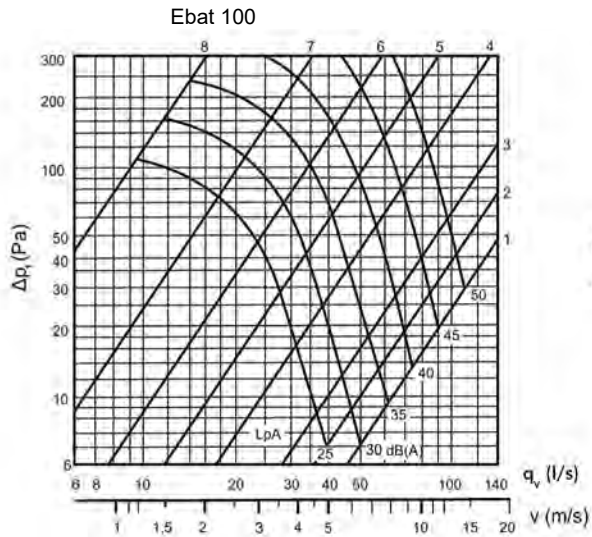

Tüm ölçüler mm'dir.
